Subject: 24 hour notice per Unilateral Administrative Order for Response Action, CERCLA Docket No. 10-2012-0200
Date: Wednesday, March 06, 2013 1:11:55 PM

Per provision 43 in the Unilateral Order referenced above, this email is to provide you with 24 hour notice of anticipated activity on the Lockheed Martin site in The Dalles, Oregon. BPA has indicated a need to replace static wires on transmission poles located within the CERCLA fence line. The dates and times for these activities are March 12 through March 17 from 0800 to 1600 every day. Only structures 2/7 and 2/8 are within the fenced area; these are the poles that were replaced last summer. The work will not involve any digging and nothing will be done outside the BPA easement footprint. Equipment to be used will include a boom truck, line puller, and dump truck. We have already confirmed with the BPA that only non-sparking tools will be used on site.

We will commit to following the directives contained in the Order as well as the EPA approved Health and Safety Plan. These include:

- Continuous monitoring in alarm mode for hydrogen cyanide and hydrogen sulfide from the perimeter inward will be conducted during all times when personnel are inside the fence.
- We will use the Multi-meter (MX6 I-Brid) that we have on site and personnel trained to use it
- Certified workers will be present to provide escort and monitoring during the BPA work inside the Lockheed Martin fenced areas
- Hourly monitoring of other field parameters will be taken while inside fence, and initial readings taken when a new location or activity is undertaken
- Cell phones will be present with each field team at all times and contact information available to all teams
- Only non-sparking tools and intrinsically safe equipment will be used on site

Please contact me if you have any questions or comments regarding this proposed activity.

Sincerely,
Connie Cole
